OBJECTIVE

To secure a challenging position as a Full-Stack Developer in an forward-thinking company to apply skills in Java, Spring Boot, React, Angular, MySQL, MongoDB, HTML, CSS, and JavaScript, driving organizational success while fostering career growth

INTERNSHIP

Java Full Stack Intern The Developers Arena (Remote) Dec 2024 - Present

- Designed and deployed a website with Angular enhancing delivery speed by 40%.
- Implemented enhanced API security measures with JWT for Multi-factor authentication and access control.
- Streamlined integration processes through complete Swagger endpoint documentation, reducing issues by 30%.
- Enhanced database query performance by 40% via efficient integration of MongoDB and MySQL.

EDUCATION

- **MCA-Aurora's** PG College GPA: 7.34 2021–2023
- **B.Sc(MPCS)-Priyadarshini** Degree & PG College, GPA: 6.8 2017–2020
- **12th (MPC)-Sri Chaitanya** Arts & Science Jr College – 80% 2015–2017

PROJECTS

Mobile Shopping Platform Using Angular N1vas-B/Intern.git

- Created a responsive Angular product catalog for a mobile shop, enhancing user accessibility on mobile platforms by 60%.
- Integrated advanced search and filter functionality, facilitating efficient product search by 50%.
- Improved user experience with an intuitive interface, garnering 98% positive feedback.
- Achieved 40% faster load times by implementing lazy loading and code optimization.
- Utilized Google Drive/OneDrive for responsive image delivery, ensuring 99% availability.

Task Management System N1vas-B/TaskApplication.git

- Developed a Full-Stack Task Management application with React, Spring Boot, and MongoDB, driving team efficiency by 40%.
- Engineered search and filter capabilities, enabling efficient task and project discovery by 60%.
- Enhanced data retrieval efficiency by 40% through optimized MongoDB NoSQL modeling.
- Implemented JWT authentication and role-based authorization, simplifying Admin and User workflows by 35%.

SKILLS

- **Software Development:** Java, RESTful APIs, HTML, CSS, JavaScript, C#
- **Development Frameworks:** Spring boot, Angular, React, Bootstrap
- **Database:** MongoDB, MySQL
- **Software Tools:** Eclipse, Visual Studio, Spring Tool Suite, MySQL Workbench
